

# Employee Digital Asset Toolkit

January 2022

# Welcome to Trellix!

Team,

At Trellix, we inspire our customers to rethink possibilities and reclaim the forward momentum that has always been the promise of security technology. Our difference is developed through our brand story. By being a champion of our brand, you can ensure everything we create and do deepens the connections among our audiences – employees, customers, partners, and stakeholders.

It's important to get grounded in our purpose, which guides every decision we make about our technology and products, and how we show up. Simply put, everything we do is to be an invigorating ally to our customers who trust us with what is most valuable to them.

This **Employee Digital Asset Toolkit** should provide you with the assets and instructions for you to help tell our story. The faster we pivot to our new brand, the faster we gain a foothold in the market.

I am so excited to welcome you to Team Trellix.

Best,

Bryan Palma  
CEO
